Technical Skills

Languages	HTML5 CSS3 (BEM) JavaScript (ES6+) TypeScript
Frameworks	ReactJS (+hooks) React Native Redux React Testing Library Jest Cypress
Technologies	NPM Yarn Sass Git Github Firefox DevTools Figma

Commercial Projects

Madina Masjid Wakefield Website | <https://github.com/Faizzy7867/Madina-Masjid-website> | <https://madinamasjidwakefield.netlify.app/>

- Developed and hosted a religious website for a mosque in Wakefield, UK, using semantic HTML5, CSS3 and JavaScript
- Collaborated with three developers to produce an aesthetic, responsive and scalable website within a month using Github and Git for version control
- Tasked with implementing the daily prayer and monthly timetable while ensuring the whole website was responsive

Personal Projects

Movie Search | <https://github.com/tahseenio/movie-search-react> | <https://tahseenio.github.io/movie-search-react/>

- Created a movie search website, using ReactJS, HTML5, CSS3 and JavaScript, that fetches from "The Movie Database" API to find movies requested by the user
- Ability to sort by top rated, trending, latest and ascending or descending user rating
- Tested functionality of various user interfaces using Cypress

Book Store | <https://github.com/tahseenio/book-store-react> | <https://tahseenio.github.io/book-store-react/>

- Created an e-commerce site using ReactJS, HTML5, CSS3 and JavaScript
- Features skeleton loading states and responsive layout on multiple platforms to cater for all users

Discord Clone (WiP) | <https://github.com/tahseenio/discord-clone> | <https://tahseenio.github.io/discord-clone/>

- Recreated the official Discord website using ReactJS, HTML5, CSS3 (flexbox and grid) and JavaScript

Treact Clone | <https://github.com/tahseenio/treact-clone> | <https://tahseenio.github.io/treact-clone/>

- Replicated a fully responsive Treact template using semantic HTML5 and CSS3

Work Experience

Freelance Frontend Developer

Apr 2021 - Current

Self-employed

Remote

- Designed and created, easily adaptable, responsive, multi-platform and SEO friendly websites using HTML5, CSS3, JavaScript ES6+ and React with best practise principles
- Efficiently communicated with client to ensure satisfaction was met and provided technical assistance when necessary

Undergraduate Civil/Structural Engineer

Nov 2021 - Current

GPA Engineering

Brisbane, Queensland

- Worked in a small team of 5 civil engineers completing small to medium brownfield projects for clients in Australia
- Created proposals and designed crucial structural components for projects worth up to \$500k
- Adhered to multiple Australian Standards (AS1170.0-4, AS4900) when designing structural elements such as concrete footings and steel structures to ensure structural integrity
- Increased efficiency of a structural integrity assessment of an existing mine, by 200% via automation of repetitive manual procedures using a programmable file sorter/renamer.

Education

Harvard University

HarvardX

Introduction to Computer Science (CS50)

Feb 2022

University of Queensland

St Lucia, Queensland

Bachelor of Engineering (Civil)

2022

Awards: Deans Commendation for Academic Excellence

Dec 2020

Relevant Coursework: CSSE1001 - Intro to Software Engineering, DECO1400 - Intro to Web Design
